Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-9,11-25, the prior art of the record fails to teach a method for traffic shaping in a computer network, the method comprising "comparing the at least one flow control parameter to at least three threshold levels comprising at least a committed threshold level, a control threshold level and a peak threshold level; and applying a link layer control mechanism to control data flow from the user network entity if a value of the at least one flow control parameter is between the committed threshold level and the control threshold level," in combination with other limitation, as specified in the independent claims 1, 11, 16 respectively.

Regarding claims 26-36, the prior art of the record fails to teach a system for traffic shaping in a computer network, the system comprising a traffic manager connected to the input interface and the output interface, the manager arranged to "compare the flow control parameter to a set of flow control threshold levels comprising a committed threshold level, a control threshold level and a peak threshold level, the traffic manager further arranged to apply a flow control mechanism to control data flow from the network entity if a value of the at least one flow control parameter falls between the committed threshold level and the control threshold level," in combination with other limitation, as specified in the independent claim 26.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
